

Composite Fencing

Designed to complement our Woodgrain Classic composite decking, and engineered using the same high quality materials, our fencing will not rot like traditional timber or require painting or staining.

Its innovative post and board design make for a straightforward construction. Tongue and groove boards simply slide into place down specially channelled posts until desired height is reached.

Components:

Post - 100x100x2400mm (See variations)

Woodgrain Fence Board - 163x20x1830 (Board face height after tongue & groove insertion 155mm)

Aluminium Top Beam - 55x20x1830

Post Cap

Additional components: Post Mount & Post Skirt available for solid surface mounting.
